Initial Market Cap Breakdown

Why to track the **Andre Cronje Projects**?

The **Andre Cronje Projects** are mostly Community-based DEFI projects, that signify how the community's view of the DEFI market. It presents a different view of the current crypto market situations comparing to index that tracks total market cap, which, traditional cryptocurrencies dominate, such as BTC, ETH, ADA, XRP, LTC, BCH, etc.

ACX Pricing = Total Market Cap of Projects Owned by Andre Cronje / 5 Billion

For example, right now the total market caps is 1.2b, **ACX price** = $1.2b/5b = \$0.24$

Tokenomics

TOTAL TOKEN SUPPLY: 10 MILLION

This is the total supply of ACX tokens at the time of launch.

INITIAL CIRCULATION SUPPLY

Most tokens sold in fundraise and allocated for the ecosystem are locked. The initial Circulating Supply of [ACX] is (18.083%) of the total supply. The [ACX] fundraise is set up to only allow investors who demonstrate strategic value and a long-term interest in the future of the project.

INITIAL LIQUIDITY

These tokens (5% of initial total supply) are allocated for initial uniswap liquidity. (We might consider to move our liquidity to sushiswap later). The liquidity will be locked for 12 months.

INITIAL MARKET CAP

Approximately 433,000 USD

Fundraise | 29% Supply

STRATEGIC PRESALE | 27%

Sell at discount price \$0.11, vest over 3 months. 9% unlocked instantly.

PUBLIC OFFERING | 2%

Sell at Price of Launch, \$0.24. 100% unlocked.

Operational Reserves | 71% Supply

ECOSYSTEM | 30%

Vested over 36 months, 0.833% of total supply released each month.

FOUNDATION | 9%

Vested over 12 months, 0.75% of total supply released each month.

ADVISORS | 6%

Vested over 12 months, 0.5% of total supply released each month.

INITIAL LIQUIDITY | 5%

Locked for 12 months.

Total Liquidity at Launch: \$240,000

LIQUIDITY RESERVE | 8%

If needed, will be used to add additional liquidity to pool.

STAKING REWARDS | 13%

The ACX staking pool can refill itself at every rebase, making it a self-sustaining liquidity staking rewards program. 13% are the initial allocation to the rewards pool.

Tokens reserved and not circulating until deployed into the staking rewards pool.
